DETAILED ACTION

Comments

This restriction is being remailed in response to an interview with Jeff Kopacz on 19 November 2007.

Claim Objections

Claim 161 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiply dependent claim. See MPEP § 608.01(n).

Claim 81 is objected to because it depends from itself.

Claims 82-84 and 86 are objected to because they depend from claim 81.

Species Elections

This application contains claims directed to the following patentably distinct species. Applicant must elect a single species from each of the three categories:

Category #1: scanning continuity (claims 6-7, 149-150)

Species A: the scanning is continuous. (claims 6, 149)

Species B: the scanning is interrupted by one or more programmed pauses during a selected time interval. (claims 7, 150)

Category #2: Stored data (claims 35-38 and 62-64)

Species C: data relating to substrate properties. (claim 35)

Species D: data relating to properties of the sensor. (claim 36-37)

Species E: relating to parameters of functions of the microfluidic substrate. (claim 38)

Species F: data relating to scanning a sensor across one or more fluid streams of the microfluidic substrate and/or varying pressure at one more microchannels of the microfluidic substrate. (claim 62-64)

Category #3: region composition (claims 47 and 115)

Species G: the region comprises a channel

Species H: the region comprises a reservoir

Species I: the region comprises a cell chamber

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-5, 8-28, 34, 39-46, 48-61, 65-100, 107-114, 116-148, and 151-161 are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or

Art Unit: 1631

employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the

prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the central PTO Fax Center.
